DRILLING COMPLETION REPORT

Per Rule 308A, this form and all required attachments shall be submitted after completing the drilling operations to drill, sidetrack, or deepen a wellbore and after changing the casing and/or cement configuration of a wellbore. If any attempt has been made to test, complete, or produce the well, the operator shall also submit a Form 5A (Completed Interval Report) per Rule 308B. If the well has been plugged, the operator shall also submit a Form 6 (Well Abandonment Report) per Rule 311.

SHARON SPRINGS	7,056		NO	NO	
NIOBRARA	7,095		NO	NO	
CODELL	7,739		NO	NO	

Operator Comments:

Top of productive zone footages are estimated and based on the top possible legal perforation point within the unit. The estimated date of completion of the pad is end of 1st into 2nd quarter 2020. The actual top of productive zone footages will be provided in the comments on the Form 5A when the well has been completed. The BHL footages are from the "ABHL" numbers listed on the last page of the directional survey attachment.

An open hole resistivity log was not ran on this well. Open hole resistivity logs with gamma ray ran on Bost Farm 32C-11-L2 (API: 05-123-47691) and Bost Farm 33C-11-L (API: 05-123-50255), which share the same pad.

Surface and production casing setting depths on Surface Cement Job Summary and Production Cement Job Summary are incorrect. Reported depths on casing tab have been verified. 1811' is the accurate surface csg setting depth and 17893' is the accurate production csg setting depth. 6 bbl wet shoe.

Due to fault, Fort Hays formation is not present in wellbore.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
