Operator Comments:

Top of productive zone footages are estimated and based on the top possible legal perforation point within the unit. The estimated date of completion of the pad is end of 1st into 2nd quarter 2020. The actual top of productive zone footages will be provided in the comments on the Form 5A when the well has been completed. The BHL footages are from the "ABHL" numbers listed on the last page of the directional survey attachment.

An open hole resistivity log was not ran on this well. Open hole resistivity logs with gamma ray ran on Bost Farm 32C-11-L2 (API: 05-123-47691) and Bost Farm 33C-11-L (API: 05-123-50255), which share the same pad.

Surface and production casing setting depths on Surface Cement Job Summary and Production Cement Job Summary are incorrect. Reported depths on casing tab have been verified. 1824' is the accurate surface csg setting depth and 18050' is the accurate production csg setting depth. 6 bbl wet shoe.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
