## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Pit liner has been removed for soil sampling and properly disposed of. If back berm of pit exists, this material will be utilized to backfill pit. Native fill material may be collected from the recontouring of cut and fill slopes. Fill material will be brought onsite, if needed, to adequately backfill pit. The top 3 feet of the pit will be filled with at least 25% native soil. If topsoil exists, this material will be overlain on the fill material. Backfilled material may be contoured in a manner to be utilized as a stormwater BMP.

Is the described reclamation complete? Yes \_\_\_\_\_

### OPERATOR COMMENT

The use of backfill material, native fill material from the recontouring of cut and fill slopes and fill material was used to backfill pit to required standards. Material was contoured in a manner to be utilized as Stormwater BMP & location was reseeded.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
