No	SOILS	Minimal	Soil Analysis
No	SURFACE WATER	None	Visual Inspection

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

COGCC was given 72 hours notice prior to sampling. A visual inspection was performed looking for signs of stained soil and potential leeching of pit components that may have been impacted surface or groundwater, none were found.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples of the pit floor, north sidewall and south sidewall were taken in May 2017. (GPS maps of samples are attached). All samples were tested per Table 910-1. Offsite samples were also taken (GPS maps of samples are attached). The south sidewall sample did not meet DRO requirements. This sidewall was resampled in 2018, please see attachments for soil analysis results and GPS coordinates of the sample. The sidewall now meets Table 910-1 requirements.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

A visual inspection has been performed looking for signs of stained soil and potential leeching of pit components that may have impacted groundwater or surface water, none were found.  
No groundwater was encountered during sampling.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

A visual inspection has been performed looking for signs of stained soil and potential leeching of pit components that may have impacted groundwater or surface water, none were found.

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):
