Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five discreet confirmation soil samples will be collected (4 wall and 1 base) from the produced water tank excavation. The base and wall samples from the downgradient wall or the sample with the highest PID reading will be analyzed for benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, gasoline range organics (GRO), and diesel range organics (DRO). In addition, the base sample will be analyzed for pH, Electrical Conductivity (EC), and Sodium Absorption Ratio (SAR). See the attached Figure 2.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

OPERATOR COMMENT

This historic release occurred at the Dunham Pad (Facility ID 469636). When I attempted to enter this Facility ID number into the eForm, the Site Information would not populate. In discussions with COGCC staff, I was directed to use Facility ID 331146. The corrected lat/long (40.087341/-104.455019) is the correct location of the release.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
