COMMENTS:

Form 4 is being filed for the Bolton-Lamberson #1 for continued TA status purposes even though the well has only been shut in. The well was shut in 11/2008 when gas sales for the field gathering system was lost. This well was in the completion stage when this happened and was never tied into the existing tank battery. A successful MIT was performed 8/11/2017. Renegade is hopeful that gas sales can be reestablished with the LDC and therefore believes the wellbore has value. The well is closed to atmosphere by surface valves with bull plugs. Environmental risk of the well is very low.

Operator Comments:

Form 4 is being filed for annual TA status reporting purposes. Renegade is hopeful that gas sales with the LDC can be reestablished. The next required MIT for the well is 8/11/2022. An additional 20K of bonding for the well has been submitted.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
