COMMENTS:

Please be advised that O'Brien Energy Resources Corp. is requesting that the Lost Creek #5 well be granted Temporary Abandonment status. O'Brien Energy is making this request for the following reasons. Due to the influx of horizontal drilling activity our wells can no longer compete with the increased pipeline pressures. In addition since 2017 the price we receive for our natural gas has become too low to economically produce the well. Recently there has been growing speculation that shale fracking could possibly be banned in the state of Colorado. If that were to happen then the Lost Creek Field would become economic again and a quicker pace. O'Brien Energy is and always will be a small family owned company that only focuses on conventional exploration. We would be able to put this well back into production when: (1) natural gas prices return to the \$3/MCF range and (2) the local pipeline pressures finally subside from all the new shale gas that's going into the system.
