## Flowline System

The Flowline Report, Form 44, shall be submitted to register, report realignment, report removal from service, or report abandonment of Off-Location Flowlines, Domestic Taps, Crude Oil Transfer Lines, and Produced Water Transfer Systems as required by the 1100 Series Rules. The Form 44 shall also be submitted to report Grade 1 Gas Leaks from Flowlines per Rule 1104.k. To register Flowline Systems, the operator will use the Form 44 to request approval of a Rule 502.b variance from the requirements for Off-Location Flowline Registration per Rule 1101.a.(2).A.viii and 1101.a.(2).B.ii.

**Operator Information**

OGCC Operator Number: 8960 Contact Person: Fred Kayser  
Company Name: BONANZA CREEK ENERGY OPERATING COMPANY Phone: (303) 3356904  
LLC  
Address: 410 17TH STREET SUITE #1400 Email: fkayser@bonanzacrk.com  
City: DENVER State: CO Zip: 80202  
Is the Operator a Tier One member of the Utility Notification Center of Colorado (UNCC) that participates in Colorado's One Call notification system? Yes ☒ No ☐

**FLOWLINE SYSTEM****FLOWLINE SYSTEM IDENTIFICATION**

Facility ID Number: Flowline System Name: RMI Oil-NP-CPF System Jurisdiction: COGCC

**FLOWLINE SYSTEM REGISTRATION**

A representative legal location and associated latitude and longitude near the center of the Flowline System.

County: WELD  
Qtr Qtr: SESW Section: 27 Township: 5N Range: 63W Meridian: 6  
Latitude: 40.366780 Longitude: -104.422710  
PDOP Reading: Date of Measurement: 10/01/2019

**FLOWLINE DESCRIPTION AND TESTING**

Date Construction Completed: 08/03/2018  
Pipe Material: Carbon Steel Bedding Material: Native Materials  
Max outer Diameter (inches): 6.000 Type of Fluid Transferred: Crude Oil  
Max Anticipated Operating PSI: 200 Testing Pressure: 550 Test Date: 08/11/2018

**Description of Corrosion Protection:**

The potential for internal corrosion in the piping is addressed by sweeping any liquids, mainly water, out of the pipe by pigging the line twice monthly.  
External corrosion potential is addressed by ensuring that all buried lines have external coating, with shrink sleeves installed on larger pipe bare joints, and taped joints on smaller pipe. All external pipe coating is tested "jeeped" prior to being installed in ditch. Galvanic Anodes are frequently installed with buried piping, and flange isolation kits are strategically used where necessary, to optimize effectiveness of cathodic protection.

**Description of Integrity Management Program:**

BCEOC has a Flowline Integrity Management Plan in place, dated April 2016. Bonanza Creek is in the process of updating this plan to ensure compliance with the COGCC 100 series flowline rules.

**Construction method used for all public by-ways, road crossings, sensitive wildlife habitats, sensitive areas and natural and manmade watercourses (i.e., bored and cased or bored only)**

Public by ways: The RMI System is installed near county roads, but not near any known and defined public receptors.  
Road crossings: The RMI System does not cross county roads. Typically county permits are acquired prior to construction of county road crossings. Permit conditions may contain minimum construction requirements.  
Sensitive wildlife habitats: The RMI System is not installed near any known sensitive wildlife habitats.

**OPERATOR COMMENTS AND SUBMITTAL**

Comments

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
