COMMENTS:

Citation Oil & Gas Corp. requests approval to retain this well in a temporarily abandoned status. The well was originally abandoned due to low production. We are currently evaluating the cost to return the well to production as uphole potential is likely based on production from offset producers. We will make a decision to RTP on or before 6/2020. There is a CIBP set at 5153' with 2 sxs cement on top isolating the Morrow perfs at 5203'-5305'. There are valves and plugs in the tubing and casing closing off the well to the atmosphere.
