FLOWLINE SYSTEM REALIGNMENT

Date: 10/31/2019

Description of Realignment:

Changes to account for in this submission:

- Risers that were connected to 1" poly return lines are now accounted for that previously were not
- Most previously labeled "out of service" lines have been reverted back to "active" status. This is due to the guidance we received that "idle/out of service" lines should only be for wells that have a downhole plug
- All "retired" lines have been changed to "out of service"
- Any pre May 2018 lines that data accuracy could not be validated has not been included in the submission
- Connector pieces on location that were not previously included are now included in order to give a full picture of line connections
- Miscellaneous line clean up in regards to geography, abandonment and line status has also occurred
