Boutt County, Colorado

Gentlemen:

On June 24, 1958 and again on October 24, 1958 a completion report was requested by this office on the above captioned well. Your Intention to drill application, dated April 21, 1958, would indicate that sufficient time has elapsed to allow the completion of this well. A completion report is due on all wells within thirty days after said completion. In the event that the well was plugged and abandoned, a plugging report, form OGCC-6 is also required in addition to the completion report, form OGCC-5.

If the well is not completed yet, we wish to know it's current status. Your immediate attention to this matter is most advisable.

Very truly yours,  
Oil and Gas Conservation Commission

J.A. McKee, Assoc. Petroleum Engineer

Gentlemen:

A review of our records indicates that we have not received the completion report on the following wells:

<u>LEASE</u>	<u>LOCATION</u>	<u>FIELD</u>	<u>COUNTY</u>
# 1 McDermott	SWNWSW 13- 6N- 86 W	wc	Routt
Would appreciate present status? last report 2-11-59 letter advising work delayed till spring.....			

We received your notice to abandon this well on \_\_\_\_\_; however, we must also have the completion report on our form OGCC-5, in order to close well file.

If this well has not been drilled to date, please advise.

According to the Rules and Regulations of the Commission, completion reports should be sent in within thirty (30) days after completion of a well. Three (3) copies for wells drilled on Patented or Federal land, and Four (4) copies for wells drilled on State lands. Some blank forms are enclosed for your convenience.

Your prompt attention to this matter will be appreciated.

Oil and Gas Conservation Commission
