Inspection Photos  
Location Name: Smits #16-1216  
Location ID: 329964

**Photo 1.** Photo taken from the Northern perimeter of the location on January 21, 2020, facing Southeast. Photo illustrates the completion of intermediate reclamation; however, Operator did not reinstall ditch and berm BMP at the time of this inspection. Germination in interim area was high but will require a follow up to due to high amounts of mowed weedy debris.

**Photo 2.** Photo taken from the Southwestern corner of location on January 21, 2020, facing East. Photo illustrates no ditch and berm BMP installed after intermediate reclamation.

Inspection Photos  
Location Name: Smits #16-1216  
Location ID: 329964

**Photo 3.** Photo taken from the southern wellhead location on January 21, 2020, facing Northeast. Weed debris present on well pad; it appeared this debris moved in from off site.

**Photo 4.** Photo taken from the eastern perimeter of location on January 10, 2020, facing North. Photo depicts no ditch and berm BMPs installed throughout site; interim reclamation germination will require a follow up visit.
