FIELD INSPECTION FORM

Loc ID 393155 Inspector Name: CONKLIN, CURTIS On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 77035
Name of Operator: SCOW* MAYLON
Address: P O BOX 1735
City: HONOLULU State: HI Zip: 96806-

Findings:

- 3 Number of Comments
- 0 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

This is an orphaned well inspection with emphasis on stormwater controls and reclamation status. As the well is part of Orphaned Well Program all other open/required tasks for well/location abandonment remain open until completed and closed.

See link at end of report for path to downloadable photo log.

COGCC Comments

Comment	User	Date
<p>On July 18, 2019 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the Maylon Scow Pilcher #1. For the most recent field inspection report of this facility, please refer to document #674901794. The purpose of this site visit was to observe Crossfire LLC removing an approximately 200 bbl. AST and excavating stained soil from location ID #393155. This work was contracted through the Orphan Well Program (OWP). COGCC SW EPS and Crossfire construction crew were on site at 0930. Track hoe arrived on location at 1100.</p> <p>The track hoe excavated a containment area to catch any residual fluids from the AST. The containment area was lined with three layers of plastic sheeting. The load out valve was opened and thin brown fluid was removed from the AST. Once the tank was drained, the track hoe tipped it over. The area beneath the corroded bottom seam was excavated and hauled to IEI in Aztec, NM. Two confirmation samples were collected by COGCC EPS staff from the excavation. Clean fill was brought in to backfill the excavated area. A Triple S water truck was used to flush out the inside of the tank, once the bolted on thief hatch was removed. The fluid in the containment area was sucked up and disposed of. All of the plastic sheeting was rolled up and disposed of by Crossfire LLC. The track hoe was used to demolish the AST. The tank was loaded onto a flatbed trailer and hauled away. The excavated areas were backfilled with the clean fill dirt and re-contoured. All personnel left location at approximately 1800.</p>	conklinc	02/12/2020
