RE: **Surface Owner Consent**  
Interim Statewide Horizontal Offset Policy  
Hergenreder 32-15  
Sec. 32 T5N R63W-Weld County, Colorado

Dear Mr. & Mrs. Hergenreder:

In September of 1986, the Hergenreder 32-15 well (API #05-123-13148) was drilled by Eddy Oil Company on the property that you presently own. This well was later plugged and abandoned on September 15, 1986. The well was plugged and abandoned to the standards required by the Colorado Oil and Gas Conservation Commission ("COGCC") at the time. However, Pursuant to the COGCC's Interim Statewide Horizontal Offset Policy, dated February 10, 2014, additional work is required on the Hergenreder 32-15 before new horizontal wells within 1,500' can be hydraulically stimulated.

Pursuant to the COGCC Policy, Confluence is required to obtain surface owner consent before accessing the subject well. Our plans for the Hergenreder 32-15 are detailed below and you will receive communication at least one week prior to all operations detailed below:

- Accessing the property with heavy equipment to re-enter the Hergenreder 32-15 and bring the well abandonment up to today's standards.
- Accessing the property to conduct final reclamation to return the land to its current state.
- Confluence will complete operations on or before March 15, 2020 pending COGCC approval.

As mentioned above, the surface owner's consent is required. Should you find these plans acceptable, please sign the space provided below.

Please contact me at 303-226-9513 or at [jlaramie@confluencelp.com](mailto:jlaramie@confluencelp.com) if you have any questions.

Sincerely,

Jake Laramie

By signing below, you consent to allow Confluence DJ LLC the right to access your property to re-enter the Hergenreder 32-15.
