#### COMMENTS:

Noble Energy respectfully requests continued TA status. The well is closed to the atmosphere via a CIBP set at 6403' on 7/23/2015. The well is closed to the atmosphere and locked out and tagged out at the master valve. The well was completed in the D-Sand formation. This well was TA'd because it is uneconomic. Noble will plug and abandon before the next MIT is due. Noble is currently working through a large back log of P&A work for offset mitigation work for DJ basin activity. Form 5A to change the status to TA was submitted on doc # 401191971. Successful MIT was performed on 7/23/2015 and was submitted on doc # 400873658. This well is tagged with a blue tag.
