**Inspected Facilities:**

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
451925	SPILL OR RELEASE	AC			-	SPILL/RELEASE POINT	EI

**General Comment:**

Environmental inspection related to apparent spill from SE corner of the eastern produced water pit. Spill ID 451925 remains open and requires a supplemental Form 19 requesting NFA status for closure.

**Environmental****Spills/Releases:**

Type of Spill: PRODUCED WATER

Estimated Spill Volume: \_\_\_\_\_

Comment: Location photographs document an apparent produced water spill from the southeast corner area of Pit 117587 (larger, eastern produced water pit) that ran into the low area east of the pit area. There is obvious erosion near the southeast corner of the pit and associated sediment deposition further east of the pit that is not consistent with the color of the cultivated field, but is consistent with the color of the pit berm material.

Corrective Action: Submit a Form 19 documenting the produced water spill. Provide all supporting data and collect a minimum of four samples from the spill sediment deposition area and one non impacted (background) soil sample for pH, EC and SAR laboratory analysis.
