INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A produced water vessel (PWV) was removed from the Dacono State 35-36 location on January 7, 2020. The PWV was located on the ground surface; therefore, no soil was excavated, and no soil samples were collected. The PWV at this facility has been permanently removed. The general site layout is depicted on the Site Map provided as Figure 1.

PROPOSED SAMPLING PLAN

OPERATOR COMMENT

The Form 27 Initial was submitted in accordance with COGCC Series Rules 905(b) and 909(c), assuming the produced water vessel (PWV) on site was partially-buried. However, upon removal of the PWV, it was determined to be a surface tank and not partially-buried. Please close this Remediation Project under the basis that no qualifying equipment under Rule 905(b) or 909(c) was discovered on location.

Should soil or groundwater impacts be identified during the removal and decommissioning of other related production equipment at this location, the required notifications will be completed, including a Form 19 Spill/Release Report.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

COA Type**Description**

	Based on the information presented, it appears that no further action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be impacted, then further investigation and/or remediation activities may be required.
	The surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules. For locations with active ongoing oil and gas operations, comply with Rule 1003 interim reclamation requirements and for locations that will no longer have active oil and gas operations, comply with Rule 1004 Final Reclamation requirements.
