#### COMMENTS:

After shut down of Kerr McGee's Third Creek gal line there is no gas sales line to sell gas. Asking to flare gas to produce oil. Approx 8 mcf pd would be flared.

Engineer	this well has not demonstrated any oil production for over 3 years(two years prior to KMG Third Creek shutdown), so the request to flare is going to be denied. The adjustments to oil volumes appear to need to be reported as water and not simply as a change in oil volumes – this should be correctly reported going forward if this well is returned to production.	02/27/2020
Environmental	The operator did not provided a laboratory gas analysis.	08/26/2019
