

OUT OF SERVICE

The image shows a vertical industrial valve assembly, possibly a wellhead or a control valve, mounted on a sandy surface. The assembly consists of several stacked cylindrical sections. The top section is a flange with multiple bolts and a central ring. Below it is a valve body with a handle. A horizontal pipe extends from the side of the valve body, ending in a smaller valve or fitting. A red tag with the text 'OUT OF SERVICE' is attached to the side of the valve body. The ground is sandy and shows some footprints.
