Operator Comments:

Location was corrected during Gas Registration update process on Form 12. Corrected range of 96W is reflected on the Form 12 and is now correct in the database and was already correctly autopopulated on this form. Form 2As not required for Gas Compressor Stations. Lat/Long is from air permit and is facility center point as determined by Google Earth (as allowed by CDPHE) as this facility was not required to be surveyed when built and originally registered.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
