Flowline Start Point Riser

Latitude: 39.537293 Longitude: -104.354752 PDOP: Measurement Date: 10/01/2019 Equipment at Start Point Riser: Well

**Flowline Description and Testing**

Type of Fluid Transferred: Multiphase Pipe Material: HDPE Max Outer Diameter:(Inches) 3.500  
Bedding Material: Native Materials Date Construction Completed: 04/15/2008  
Maximum Anticipated Operating Pressure (PSI): 25 Testing PSI: 65  
Test Date: 10/04/2019

**OPERATOR COMMENTS AND SUBMITTAL**

Comments Initial off-location flowline registration and pressure test for the Whitehead 8-15. Well is currently producing with gas being combusted due to the Anadarko Third Creek Gathering System shut down. Prospects for gas sales are unknown at this time.  
Per discussion with Ellice Whittington of the COGCC staff, the location ID of the Whitehead 8-9 well (381945) was not used as the end point location even though the facility of the Whitehead 8-15 is located on the Whitehead 8-9 site. The Whitehead 8-9 was plugged in 1987 and the Whitehead 8-15 has continued to use the facility since. It was thought that a new location ID number would be appropriate.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
