

**Pre-Abandonment Notification for Off-Location Flowlines
Barnes SWD to FC Leidy Com 1 Fiberglass Pipeline Project
(Central Produced Water System)**

Submitted 03/03/2020

See the attached map “Barnes SWD to FC Leidy Com 1 Water Pipeline Abandonment” dated 2/5/2020 for proposed abandonment flowline details corresponding with the exception rationale below.

Note: all drainages shown on the attached map are obtained from the National Hydrography Dataset (NHD) from the United States Geological Society (USGS).

The below waterline pipeline segments are fiberglass mileage associated with COGCC Order No. 1V-701.

SEGMENT DETAILS

Segment A to B: approximately 3,375 ft. 6-in off location fiberglass flowlines; three lines, each 1,125 ft. (produced water)

Abandonment in place is proposed for the labeled off location flowline pursuant to the following:

- This segment is co-located with other active pipelines including third party lines [1105.d.(2) C];
- This segment is within a mapped wetlands area and crosses a stream [1105.d.(2) G].

Segment B to C: approximately 3,235 ft. 6-in off location fiberglass flowline (produced water)

Abandonment in place is proposed for the labeled off location flowline pursuant to the following:

- This segment is co-located with other active pipelines including third party lines [1105.d.(2) C];
- This segment is within a mapped wetlands area and crosses a stream [1105.d.(2) G].
