**COMMENTS:**

Bonanza Creek respectfully requests continued TA status. The Antelope 43-19 was plugged back with CIBP @ 6278' with 2 sacks of cement on 11/07/2018. Form 5A to report TA status of Nio/Codell was submitted 12/31/2018 (Doc # 401880798). The well was SI and plugged back due to offset HZ frac of Bonanza Creek's Antelope T-19 Pad. The well is closed to the atmosphere via valve locked out and tagged out at the master valve, and the a "Temporary SI for HZ prep" sign is attached to the master valve. Well pressure tested at time of CIBP setting; pressure tested to 1000 psi, held pressure for 10 minutes, test was good. This well will remain TA'd until and after frac completion pad, previously mentioned, is completed. Bonanza Creek has this well on their Projected P&A budget planning schedule for the next years to come, as budgets allow. If not PA'd by that time, an annual TA sundry notice will be submitted in 1st Quarter 2021 to update the COGCC on the plans of this well.

**Operator Comments:**

This form is being submitted as the 2020 Annual Continued TA status request. If not PA'd by then, an annual TA sundry notice will be submitted in 1st Quarter 2021 to update the COGCC on the P&A plans of this well.

MIT test will be ran at the 2 year mark of the last producing month.

Operations summary for informal pressure test verification is attached to this form. Please note, form 5A has TA date off by 1 day. Operations summary confirms this well was TA'd on 11/7/2018.

Original Form 4 Continued TA request sundry (doc #401884246) was returned to draft. Upon drafting this form, draft form 4 was found. Comments on returned to draft form indicated Form 7 production corrections were needed- Bonanza Creek production team has been notified to submit.

Bonanza Creek has notified field personnel to run pressure tests for 15 minutes on future TA wells.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Signed: \_\_\_\_\_ Print Name: Aubrey Noonan
