

Legend

- Pothole location with no impacts observed to 24" bgs
- Pothole location with potentially impacted soil observed
- Pothole location with hydrocarbon liquids observed
- Pothole location advanced in the flow path to 12" bgs
- Flow path surface staining. Impacts extending to less than 6" bgs
- Hydrocarbon liquids observed extending from 0"-24" bgs
- Hydrocarbon liquids observed extending from 0"-36" bgs
- Hydrocarbon liquids observed extending from 0"-48" bgs,
- Earthen Berm
- Proposed hand auger boring location
bgs – below ground surface

PROJECT NO:	
DRAWN BY:	JED
DATE:	4/16/20

Pierce Central Tank Battery Spill
 Pothole Excavation Investigation (February 25, 2020) and
 Proposed Hand Auger Boring Location Diagram
