**General Comment:**

**COGCC Inspection Report Summary**  
On Friday 4/17/20 at approximately 10:30 AM, I, Inspector Scott Ramsey, conducted a follow up inspection at Maralex Rifle-Boulton #1, at Location # 322369 in Garfield Colorado.  
While there, I observed all C/A(s) from previous inspections document #S 689302263 and 689301993 have not been completed, previous inspections were done 11/05/2018 and 9/26/2018. This well is T/A.  
The Braden head is plumbed into the tank and is open to the tank, I could hear the Braden head venting into the tank from approximately 300 foot away. The tank has a pipe on the side that is attached and open to atmosphere.  
During this inspection the following possible compliance issues were observed:

- Well head sign is missing (C/A date 10/28/2018)
- Unused, unmarked flow lines (C/A date 10/28/2018)
- Debris in and around tank battery
- MIT is not current and there is no form 4 (C/A date for form 4 is 10/28/2018)
- Secondary containment is not satisfactory
- Emergency contact does not have 911
- Tank is not labeled properly

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
