Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

4:00pm 16 Mar 20 we discovered a leak coming from the Janet pad dualpac. I had the well shut in and isolated the leak. Within 20 min had a Vac truck pull all standing fluid inside and outside the building. Total amount of fluid we determined was around 8bbbls with 5 being contained within the building's sump and 3 spilling out of the building on the surrounding ground. Continuing excavation of all contaminated soil. When Cleanup is complete I have instructed Absaroka Energy and Environmental Solutions, LLC. To conduct soil samples.
