CORRECTIVE ACTIONS:

1 CA# 137382

Corrective Action: Remove horse trailer from oil and gas location.

Date: 04/24/2020

Response: CA COMPLETED

Date of Completion: 04/24/2020

Operator  
Comment:

Landowner does not want his property removed. The trailer is not burdening the operator at this time and is located on the fee surface owners land. This location has a surface use agreement between the operator and landowner, and therefore the edge of location is still the landowners. It is requested that the COGCC take time to meet with Hilcorp and landowner on location to discuss.

**2** CA# 137383

Corrective Action: Stormwater controls need to be installed to stabilize erosion within the project area. Stormwater controls need to be sized, selected, installed, and maintained according to good engineering practices such as those described by CDOT in their erosion control manuals.

Date: 04/24/2020

Response: CA COMPLETED

Date of Completion: 04/24/2020

Operator Comment: They filled the erosion channel with top soil and reseeded. They also built a berm up on the edge of location to keep the storm water from running off
