General Comment:

COGCC joint inspection with EPS J. Heil and Western Integrity Inspector R. Murray

Engineering Integrity Inspection performed on April 23, 2020. In response to Form 19 Document number 402356758

Flowline was repaced and in service at time of inspection

Inspected Facilities

Facility ID: 474500 Type: SPILL OR API Number: - Status: AC Insp. Status: EG

Flowline

#1	Type: Sales Line	1 of Lines
----	------------------	------------

Flowline Description

Flowline Type: Sales Line Size: 10" Material: Carbon Steel
 Variance: No Age: 5-10 Yrs Contents: Multiphase

Integrity Summary

Failures: Other Spills: Yes Repairs Made: Yes
 Coatings: Yes External H2S: No Cathodic Protection: No

Pressure Testing

Witnessed: No Test Result: Charted:

COGCC Rules(check all that apply)

☐ 1101. Installation and Reclamation ☒ 1102. Operations, Maintenance, and Repair ☐ 1103. Abandonment

Comment: Operator stated on form 19 (initial)

At approx. 2:00 pm on 3/30/2020 during pumping operations, operator noticed a mist coming from the pipeline right of way near the Long Ridge J15. Operator called it in and began shutting in wells, isolating and blowing down the line. This is a 3 phase line so there is produced water mixed with condensate. The mist melted the snow in a 5'X15' area estimated to be less than 5bbl. Clean up will begin as soon as we can clear the roads of snow and safely get equipment and crews on site.

10" flowline was replaced with 4" Carbon steel flowline, Flowline was replaced with new 4" from can to can, Approximately 500', see photo log.

Corrective Action: Provide pressure test results, performed before returning back to in service, Via FIRR and email to Western Integrity inspector

Provide Root Cause when information becomes available. Via FIRR and email to Western Integrity inspector

Provide flowline annual pressure test data results for previous year. Via FIRR and email to Western Integrity inspector

Date: 05/15/2020
