Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Initial actions included conducting a review of water well databases to identify water wells within 1/2 mile of the location and preparing a scope of work for the assessment of the former drilling pit.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☐ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

☐ Is further site investigation required?

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Waste remaining in place meets Table 910-1 screening levels and/or criteria described in COGCC 2008 Rulemaking Frequently Asked Questions (#32) related to depth of clean cover with five (5) minor exceptions. The pH values of soil samples collected from depths shallower than 3' BGS exceeded the Table 910-1 screening level of 9.0 (B2=9.44, B3=9.06, B4=9.28, B6=9.17, B8=9.20).

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

The site assessment conducted at this former drilling pit location shows that there is no impact to soil above Table 910-1 screening levels except where acceptable based on COGCC 2008 Rulemaking Frequently Asked Questions (#32) related to depth of cover over waste left in place with five (5) minor exceptions as noted above. Since the pH values of the five (5) shallow soil samples collected at the site ranged between 9.06 and 9.44 (Table 910-1 SL = 9.0) and the winter wheat crops cultivated above the former pit have been unaffected by the pH values, we are not proposing further remedial activity for shallow soil at this location. Kinder Morgan has recently received approval to leave the buried pit liner in place at this location (see Doc #402363516) therefore we are requesting closure of Remediation Project #9885.

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? Yes _____

Do all soils meet Table 910-1 standards? No _____

Does the previous reply indicate consideration of background concentrations? _____

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? No _____

Does Groundwater meet Table 910-1 standards? Yes _____

Is additional groundwater monitoring to be conducted? No _____

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

This site is currently used for non-irrigated crop cultivation with the current and previous growing seasons planted in winter wheat.

Is the described reclamation complete? _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim? ☐ Final?

Did the Surface Owner approve the seed mix? _____

If NO, does the seed mix comply with local soil conservation district recommendations? _____

OPERATOR COMMENT

Pit liner was encountered in a single soil boring (B7 at a depth of 6' BGS) advanced at this site and several small pieces of pit liner were observed on the ground surface. Kinder Morgan has obtained a waiver from the landowner granting permission to leave any portions of the liner currently in the subsurface to remain in place and facilitated the recording of a restrictive notice on the property. Kinder Morgan has recently received a variance to COGCC Rule 905.b.(3)A - Disposal of Pit Liner and at this time we are requesting closure of Remediation Project #9885.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
