General Comment:

This is a follow up Reclamation Inspection of the CHEROKEE & PITTSBURG #535 well site which was Plugged and Abandoned on 8/17/2016.

Not all of the previous corrective actions have been completed.

Previous corrective action date remain for enforcement purpose.

See attached photos and additional details within this report.

Operator is directed to perform corrective actions outlined on this inspection report immediately. This inspection is being entered for notification and documentation only and is not intended to provide the Operator the opportunity to resolve the alleged violations without the imposition of a penalty, pursuant to Rule 522.c.(1). Perform corrective actions immediately to avoid further enforcement and potential penalties.

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
<p>Comment: The erosion along the main road was graded and repaired. It is uncertain if the repairs will be sufficient for longterm stabilization. The straw bales installed at the culvert outlets are not longterm stabilization methods. Stormwater should be diverted from flowing down the road. BMP's must be implemented in accordance with good engineering practice and must be maintained for longterm stabilization.</p>						
Corrective Action:						Date: _____
Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT						

COGCC Comments

Comment	User	Date
Ensure soils are properly recontoured and decompacted by cross ripping to a depth of 18 inches.	CostaR	04/28/2020
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	04/28/2020
