## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	GROUNDWATER	TBD	Laboratory Analytical Results
Yes	SOILS	14' X 9' X 3' bgs	Laboratory Analytical Results

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

During cut and cap operations at the Weezer G3-22 wellhead crews discovered soil impacts in the vicinity the wellhead due to a historical release.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Six soil samples were collected during site investigation activities by Fremont Environmental and submitted to Summit Scientific for analysis of TPH-DRO by EPA Method 8015, TPH-GRO, BTEX, and Naphthalene by EPA Method 8206b. Additionally, six soil samples were collected to determine the extent of impacts outside of the source area. These soil samples indicated impacted soil only remained at the source area.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

One grab groundwater sample was collected by Fremont Environmental and submitted to Summit Scientific for analysis of BTEX by EPA Method 8260b. Additionally, five groundwater monitoring wells were installed to determine if dissolved phase impacts existed outside of the excavation. Fremont Environmental collected five groundwater samples and submitted them for analysis of BTEX by EPA Method 8260b. All six groundwater samples were non-detect for BTEX.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Four surface water samples were collected and analyzed for BTEX by EPA Method 8260c and Dissolved Methane by RSK 175 .

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)               Volume of liquid waste (barrels)         

Is further site investigation required?

Additional monitoring wells will be installed subsequent to plugging and abandonment operations.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Site assessment results the impacted soil has been defined and is localized by the plugged and abandoned well head. Do to safety concerns, source removal will be conducted once all wellheads are plugged and abandoned. Five soil borings were installed and completed as monitoring wells to determine if dissolved phase impacts existed outside the source area. All monitoring wells were non-detect for BTEX.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Source removal will be conducted once all wells are plugged and abandoned. Additional monitoring wells will also be installed to delineate dissolved methane in the groundwater. Isotopic analysis will be conducted to determine the extent of microbial oxidation in each monitoring well.
