General Comment:

On 4/28/2020, Reclamation Specialist Trujillo conducted a final reclamation and stormwater inspection at Chevron USA Inc's Fee 71 location in Rio Blanco County, Colorado.

This inspection is a follow up to Inspection #696200930 dated 1/28/2020

This inspection is to document compliance for the following corrective actions:
1004.a: Remove trash debris and equipment from Location

It was documented that the trash debris observed and utility equipment has been removed; Vegetation on the Location is predominantly weedy and not reflective to that of the adjacent reference; Location is not progressing towards 1004 reclamation standards.

The following compliance issues were observed during this inspection:
1004.a

Refer to the "Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

VEGETATIVE COVER _____

Comment:

It was documented in FIR #696200930 that utility equipment and debris remained on the Location and that a followup inspection will be required as snow cover prevented reclamation specialist from conducting an accurate assessment of the reclamation.

It was observed in this inspection that the trash debris and utility equipment has been removed. However, vegetation on the location is predominantly bare soil, not reflective of the reference, and not progressing towards 1004 revegetation standards; little desirable vegetative germination/establishment observed; additional reclamation activities is required for uniform establishment.

Corrective Action: **Comply with 1004.a; conduct additional reclamation activities to facilitate desirable vegetative establishment.**

Date **07/31/2020**

Overall Final Reclamation **Fail**
