Comment: This location does not comply with Rule 1004. Operator attempted final reclamation activities with the evidence of drill rows; however, there is little establishment desirable plant species. The well location consists mostly of weedy, annual vegetation and bare ground. Appears vehicle traffic has potentially compacted the reclamation area and comprised the success of revegetation. There has potential been 3 years of growing seasons and only minimal establishment of desirable species.

Inspector Name: Binschus, Chris

Corrective Action:	Comply with Rule 1004. Revegetation activities shall be complete no later than 11/15/20 or as soon as environmental conditions will permit.	Date	11/15/2020
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Note: it appears adjacent reference areas have been continuously grazed without adequate recovery opportunities. Operator should consider temporarily fencing off reclamation areas to allow the establishment of perennial species as well as keeping vehicle traffic off reclamation areas.	binschusc	05/04/2020
