Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

COGCC Inspector Randy Silver performed a Field Inspection at the Parker 44-15 facility on May 2, 2019. During Mr. Silver's inspection he recorded that the ground around the produced water tank was saturated. Mr. Silver noted that the saturation was observed at a minimum of a 40 square foot area, at a depth of 12 inches below ground surface. KPK will inspect the location on May 3, 2019 to further investigate the issue surrounding the fluid release. Once additional details are collected, they will be provided in a supplemental Form 19.

Description

	Based on review of the information submitted in project 13908 which is ongoing at this time, it is concluded that the proposed investigation activities and proposed remedial actions in the approved site investigation and remediation plan will be adequate to remediate impacted soils at the site of the spill. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.
