Access Roads Regraded Pass Contoured Pass Culverts removed Pass

Gravel removed Pass

Location and associated production facilities reclaimed Pass Locations, facilities, roads, recontoured Pass

Compaction alleviation _____ Dust and erosion control Pass

Non cropland: Revegetated 80% **Fail** Cropland: perennial forage _____

Weeds present _____ Subsidence Pass

1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment:

The fence post and wire have been removed from the location. The vegetation is well established along the access road and the eastern portion of the location. The western portion of the location has not established desirable vegetation and consists predominately of undesirable weeds. It appears from historic imagery that this area was where the pit was located. It is possible that soil issues in this area are impacting desirable vegetation growth. Soils may need to be evaluated to determine if amendments are needed. This area will need to be reseeded to facilitate vegetation establishment.

Corrective Action:

Comply with 1004 Rules

Date **07/22/2020**
