Hello again,

Please just respond to the most recent inspection, no need to put in FIRRs for the other two Inspections on the same location. If the inspections had different CA then multiple FIRRs might make sense but in this situation one FIRR for the location regarding the same CA is appropriate.

Best, Denise

Thank you Denise, I will respond to the most recent FIR and will reference the previous two. My FIRRs would be very similar for all three inspections so if you'd like me to respond to each individually please let me know.

Thanks

Hello Mr. Verbonitz,

Thank you for your correspondence and your commitment to conducting the reclamation and responding to the corrective actions. Aaron is on vacation so I wanted to respond. I think it would best for you to respond to the most recent inspection on an FIRR since the CA are for the same issue.

Thank you again for your commitment

Best, Denise

Hello Mr. Trujillo,

We are in process of conducting work to meet the CAs assigned for three Rio Blanco County locations. As well as performing some reclamation maintenance work on a few other locations in the field that aren't quite ready to close out.

My only questions pertains to the responses due for the Loc Id: 315536 Name: EQUITY CALUP-62N102W 21SENW (Equity Calup 2-21). Since we have had three inspections there, all with the same CAs and date. Will I need to respond to each inspection individually?

Thanks

Good Afternoon Mr. Verbonitz,

My initial inspection in January was a result of me being new to the area (took over a portion of the NW region from Lou in December) and that this well was on my high priority list for inspections. As I was unable to personally get a good look of the location due to snow cover in January, I needed to do a follow up once conditions had improved. I found myself in the area of the Location this week, and with clear conditions I was able to more accurately assess the Location. According to well file records, the last inspection on this Location was conducted 7/22/2019 and submitted 9/21/2019. I am unsure as to why the report was submitted almost 3 months later but I will do my best to ensure my inspection reports are submitted to Bayswater in a timely manner.

I have no doubt that Bayswater will conduct the work by the corrective action date and I look forward to seeing the Location return to compliance. Please submit a resolution form with documentation once the work has been completed.

In regards to the other Location(s), please provide a Location ID(s) and your questions and I will answer them to the best of my ability and as soon as possible.

Thank you and have a nice weekend.

Good afternoon Mr. Truillo,

I'm hoping you might have some time early next week to discuss this location (and maybe a few others) with me. I have record of a Final Reclamation Inspection being conducted on 9/21/2019 (Doc # 692401232) which detailed CAs to be completed by 5/31/2020. Based on that date, which I'm planning to comply with, I'm unsure why additional follow up inspections are being conducted prior to the CA date of 5/31/2020. Is there a good number I can reach you at next week? I would like to discuss this inspection with you.

Thanks
