Hi Ariana,

Please find COGCC's 1041 Response for the following Form 2A: Allred 8-59 30 Form 2A Doc# 402289528.

ON HOLD: This application has been reviewed by COGCC staff and cannot be approved based on the information submitted; therefore, the COGCC is placing this form ON HOLD until additional information is received from the applicant.

In compliance with § 24-65.1-108(1), C.R.S., the COGCC is providing this written request for all additional information necessary for the COGCC to respond to this application. The applicant may provide all requested additional information to COGCC via email. Upon receipt of all requested information, the COGCC will have 60 days in which to approve, deny, or request all additional information necessary to complete the regulatory review. If the applicant no longer requires this application be approved, the applicant may request to withdraw the application.

In addition to all standard required information and attachments, the COGCC hereby confirms the following information is necessary for review:

1. Please provide any updates to the WOGLA.
2. Please confirm whether the existing land use is rangeland or CRP land.
3. Downgradient surface water. Please let me know if you concur with changing the distance from 199 to 196 ft., in order to match the Hydrology Map.
4. BMPs.
 - a. Lighting BMP. The current BMP only discusses permanent lighting. If temporary lighting will also be directed down and inwards, please include that in the BMP.
 - b. Please provide any remote monitoring or remote shut-in BMPs.
 - c. Please provide a basic stormwater BMP.

This request for additional information stops the statutory 1041 60-day clock for the COGCC's review. The COGCC will resume review of the Form(s) upon receipt of all required information and the COGCC review will be conducted within 60 days. Bison is under no obligation to respond to this email; the Form(s) will remain ON HOLD, with all data and attachments intact, until Bison provides COGCC with all necessary requested information. Bison may request the Form(s) be withdrawn if that is preferred.

Please direct all questions or responses to Brian Christopher.

Thank you,

Brian Christopher

Hello,

Please see response below in red:

1. Please provide any updates to the WOGLA.

The hearing for 1041WOGLA20-0008 has been postponed to 5/7/2020. This application is complete with Weld County, and no significant comments were received during the review period.

2. Please confirm whether the existing land use is rangeland or CRP land.

The land use is Rangeland.

3. Downgradient surface water. Please let me know if you concur with changing the distance from 199 to 196 ft., in order to match the Hydrology Map.

Yes, this is fine to update.

4. BMPs.

- a. Lighting BMP. The current BMP only discusses permanent lighting. If temporary lighting will also be directed down and inwards, please include that in the BMP.

Please update the BMP to the following:

All temporary & permanent lighting installed on location shall be directed downward to illuminate key areas within the facility, while minimizing the amount of light projected outside the facility.

- b. Please provide any remote monitoring or remote shut-in BMPs.

Please add the following BMP:

Operator shall use a Supervisory Control and Data Acquisition (SCADA) system in conjunction with tank level indicators which have the ability to automatically shut in wells during an upset condition.

- c. Please provide a basic stormwater BMP.

Please add the following BMP:

Storm water controls will be constructed around the perimeter of the site prior to construction. Typically, Bison Oil & Gas II utilizes a ditch and berm system of storm water control at its sites. BMPs used are determined prior to construction and may vary according to the location. Storm water controls will remain in place until the pad is stabilized or reaches final reclamation.

Thank you,

Ariana Solis

Ariana,

I put this Form back into process. The COGCC review will resume and be conducted within 60 days (by 7/3/2020).

Ariana,

The Allred location passed Objective Criteria Review this afternoon. I am putting it together to go into Final Review and had an update I wanted first. Can you send over an updated Construction Start date and if needed a new Interim Reclamation Start date?

Thanks,

Hi Brian,

Please update the construction start date to 8/1/2020, and the reclamation start date to 2/1/2020.

Thank you,
Ariana

Ariana,

I updated the interim to 2021 and put them in.

Thank you.
