General Comment:

This is a COGCC Environmental Inspection of vault removal (Remediation #15328) reported by Operator on 5/8/2020. After final closure was approved (Form 27 Doc #402393444) Operator contacted COGCC and self-reported that the latitude/longitude provided within the form and soil sample location map (Doc #402393687) was incorrect. Based on correspondence with Operator and COGCC Field Inspection (Doc#691201289) coordinates and map are for the Noble Urich 5-27 battery (Facility ID 476577).

At the time of inspection the produced water vault and all PDC equipment had been removed from the site; the DCP meter shed was still on site. PDC signage was still present at the entrance and on location, and the road base was stockpiled for future removal. The location was graded and no soil staining was observed.
