Comment:

The location is not in compliance with the Final Reclamation requirements. There are 4 guyline anchors and markers that remain at the location. There is debris at the east side of the location (concrete, wood). There is predominately undesirable weed growth and weed debris throughout the location. Previous inspection noted soil compaction at the location. There is erosion issues along areas of the main road which need to be recontoured. Previous corrective actions were not performed. Perform corrective actions immediately to avoid potential enforcement.

Corrective Action: **Comply with 1004 Rules.**

Date **07/01/2016**

Overall Final Reclamation **Fail** Well Release on Active Location Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: There is erosion issues along areas of the main access road. The road has eroded in areas and is below the grade of the surrounding land. Areas of erosion along the road used to access the site need to be repaired and stabilized. BMP's must be implemented in accordance with good engineering practice and must be maintained until final reclamation is achieved.

Corrective Action: **Install or repair required BMPs per Rule 1002.f.(2)C**

Date: 07/01/2016

Pits: NO SURFACE INDICATION OF PIT
