453792	SPILL OR RELEASE	AC	07/02/2018		-	SPILL/RELEASE POINT	EI

General Comment:

On May 18, 2020 COGCC Environmental Staff (Alex Fischer) was at the Margaret Spaulding #2 API 057-06011 and Pit Facility ID 115241 to observe soil boring advancement and sampling and groundwater monitoring well sampling, and the Noffsinger 1-C API 057-06021. Fremont Environmental (Mike Gerstner and Paul Henehan) directed Drill Pro (drilling contractor) using a GeoProbe 6620-DT for the soil borings advancement. Weather was sunny, and temps in the mid 60s at time of inspection. The Facility's and Field are SI at this time.

NOTE: Well status shows SI but should be AB.

<p>API 057-06011 - Well is PA, Margaret Spaulding 2.</p> <ul style="list-style-type: none"> • Approximately 30' dia excavation 2-3 feet deep. Soil Boring SB-1 was advanced to 21' (refusal) below the ground surface (bgs) from the floor of the excavation. A photo ionization (PID) reading of 700 ppm was measured in a sample collected at 12' bgs, then the materials cleaned up (based on visual observation) at about 16' bgs. A total of 12 borings were advanced in and around the excavation and according to Fremont the subsurface material appeared to be relatively clean (based on visual and PID readings). Groundwater was not encountered. Fremont collected samples for laboratory analysis and will be preparing a report with their findings. • Two (2) surficial samples were collected in the footprints of Spill ID 453327 and 453792. <p>NOTE: Well status shows SI but should be AB.</p>	fischera	06/03/2020
