## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A produced water vessel (PWV) was removed from the NESG-63N68W 24SWSW location on March 12, 2020. The PWV was located on the ground surface; therefore, no soil was excavated, and no soil samples were collected. The PWV at this facility has been permanently removed. The general site layout is depicted on the Site Map provided as Figure 1.

### OPERATOR COMMENT

The Form 27 Initial was submitted in accordance with COGCC Series Rules 905(b) and 909(c), assuming the produced-water vessel (PWV) on site was partially-buried. However, upon removal of the PWV, it was determined to be a surface tank and not partially-buried. Please close this Remediation Project under the basis that no qualifying equipment under Rule 905(b) or 909(c) was discovered on location.

Should soil or groundwater impacts be identified during the removal and decommissioning of other related production equipment at this location, the required notifications will be completed, including a Form 19 Spill/Release Report.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
