## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

As required by COGCC Rule 905.b., confirmation soil sampling was conducted when a buried or partially buried produced water vessel was removed from service. During the removal of the vessel, historic hydrocarbon impacts were discovered and reported via eForm 19. Excavation and sampling activities are summarized in the attached site-specific eForm 19s.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil encountered in the excavation was field screened for volatile organic compound (VOC) concentrations using a photoionization detector (PID). Soil samples were collected from the excavation extent and submitted to Summit Scientific Laboratories (Summit) for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, total petroleum hydrocarbons (TPH) – gasoline range organics (GRO) by EPA Method 8260B, and TPH – diesel range organics (DRO) by EPA Method 8015.

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater was encountered below the vessel, a groundwater sample was collected and submitted to Summit for laboratory analysis of BTEX by EPA Method 8260B.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):
