#### COMMENTS:

We will install a total of 2 check valves per well with the ability to test/verify that the check valve integrity is good. This will tie into the flowline/ sales line. Below is the description of the equipment configuration and the proper pressure regulation with check valves. We will be using a Fisher Little Joe for pressure regulation this is quality regulator. We will have it setup so we can monitor the check valves to ensure good integrity and also have a backup check valve on this line. This well has automated BH pressure monitoring as well already installed. We had one spike when Enterprise was down but that doesn't happen very often.
