General Comment:

inspection of area where production facilities for well were located .

Site Investigation and Remediation Plan Project 8969 was submitted on 03/19/2015 by Jeff Hunter acting as agent for operator of Keto 3-7J oil and gas well. Site investigation was submitted to document investigation and removal of impacted soils beneath production equipment including steel above ground storage tank which in a 2014 inspection was reported to have a SE corner of its earthen berm at 40.320800, -104.930770.

No documentation following site investigation (if done) regarding results of site investigation and remediation activities are present in COGCC records.

Submitted site investigation plan indicated spill/release was likely present at production facility but no formal report of spill is present in COGCC records.

Area used for production facilities has not been adequately reclaimed as required by the 1000 series rules

LocationOverall Good: ☐

Corrective Action:

Date: _____

Overall Good: ☐**Spills:**

Type	Area	Volume		
Produced Water	Tank			
Comment:	area of former production facility has little vegetation which may indicate impacts from produced water are present at site. Area shown in attached photo			
Corrective Action:	Submit documentation of site investigation by supplemental form 27 if investigation was completed and it was documented that soils at site met Table 910-1 thresholds. If site investigation was not performed or impacted soils were not removed and documented then submit a revised form 27 supplemental with dates certain when work will be performed.			Date: 07/02/2020

In Containment: No
