Comment:

Corrective Action:	Operator attempted to conduct final reclamation activities; however, the establishment of desirable plant species was not uniform throughout. Patches of weedy, undesirable annuals (mostly Kochia) were observed along the access road and well location. Operator shall perform additional reclamation activities no later than 11/16/2020.	Date 06/23/2020
	Scotch and Musk thistle, both List B CO Noxious weeds, were observed at the well location. Musk appears to recently flower while no Scotch was observed flowering at the time of this inspection.	
	Comply with Rule 1004.e. to control and manage Scotch and Musk thistle no later than 6/23/2020.	
	Note: weed management will also need to be conducted to control and manage Kochia but Operator does not have to do that by 6/23/2020.	
	Operator shall also perform additional reclamation activities no later than 11/23/2020, including the removal of culverts, which will likely mean additional recontouring.	
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
