COMMENTS:

On 6/17/2020, a Form 17 was completed with a beginning pressure of 108 psi. Gas was present at the beginning of the test, but was not continuous. Due to the initial pressure being high, Noble will install automation, monitor and blow down as needed for a period of 6 months, ending 12/17/2020. A bradenhead gas sample was collected during the Form 17 and will be submitted once the lab analysis is complete. No mitigation measures have occurred to date, the blow downs will begin after email communication with the COGCC engineer, Nick McFarland."
