Comment:

This well location was associated with a Remediation Project (#12459). Operator submitted a Final Closure request via Form 27 Doc.# 402363750, which states remediation was complete on 3/25/2020. Even though the excavation area appears to be backfilled, compacted, and re-graded, soil stockpiles remain at the well location.

Active remediation was ongoing during the time that winter wheat was planted; therefore, no crop would have been planted at the well location or access road.

Collaborate with the landowner to determine mitigating measures that will allow reclamation work for the well location and access road to be conducted in such a manner as to not interfere with agricultural activities or crop production.

Corrective Action:

Overall Final Reclamation

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment:

Stormwater erosion was observed discharging off the northeastern location and discharging into the additional disturbance area to the north. Current BMPs are not in proper functioning condition.

Corrective Action:

Comply with Rule 1002.f.(2) to control stormwater runoff in a manner that minimized erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004.

Date: 07/09/2020

Pits: ☐ NO SURFACE INDICATION OF PIT**COGCC Comments**
