**COMMENTS:**

On 6/17/2020, a Form 17 was completed with a beginning pressure of 108 psi. Gas was present at the beginning of the test, but was not continuous. Due to the initial pressure being high, Noble will install automation, monitor and blow down as needed for a period of 6 months, ending 12/17/2020. A bradenhead gas sample was collected during the Form 17 and will be submitted once the lab analysis is complete. No mitigation measures have occurred to date, the blow downs will begin after email communication with the COGCC engineer, Nick McFarland."

**CASING AND CEMENTING CHANGES**

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: McFarland, Nick Date: 6/26/2020

**CONDITIONS OF APPROVAL, IF ANY:**

<u>COA Type</u>	<u>Description</u>
	Shut in bradenhead pressure shall not exceed 50 psig.
	<ol style="list-style-type: none"> <li>Operator shall implement measures to control venting, to protect health and safety, and to ensure that vapors and odors from well operations do not constitute a nuisance or hazard to public welfare.</li> <li>Prior to starting bradenhead mitigation, if a sample has not been collected within the last twelve months collect bradenhead and production gas samples for laboratory analysis. Sampling shall comply with Operator Guidance - Bradenhead Testing and Reporting Instructions, Appendix A: Liquid and Gas Sampling. Copies of all final laboratory analytical results shall be provided to the COGCC within three months of collecting the samples.</li> <li>Operator shall implement measures to get an initial estimate of the gas flow rate and/or volume from the bradenhead. During the shut-in period record pressure data to adequately characterize the build-up. This mitigation plan may be used for six consecutive months from the date test reported on the Form 17.</li> <li>At the conclusion of the six months (12/17/2020), conduct a new bradenhead test and submit the Form 17 within ten days of the test and submit a Form 4 Sundry that summarizes current well condition. The sundry should include details of the future plans and the flow rate information and pressure data.</li> </ol>

**General Comments**

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	BH test 4/12/2019 97 psi flowing gas down to 0 within 10 minutes. No sample taken. BH test 6/17/2020 108 psi flowing gas down to 0 within 10 minutes.  This BH mitigation sundry is late. Initial sundry should have been filed within 10 days of the test in 2019.	06/26/2020
