Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

KPK was notified of a flowline release at approximately 9:15 pm on 6/20/2020 by the surface owner. Entire flowline system was shut-in on 6/20/2020 in response to the notification. Release occurred in a corn field affecting at least one row of corn in the field. Additional investigation is needed to confirm the root cause of the flowline failure. Initial excavation and hydrovac'ing was performed to remove any pooled liquids present at the time of response to the flowline release notification. Based on historical release information, release has occurred at the location of spill/release point 470915 & REM project #15409.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 07/01/2020

Root Cause of Spill/Release Equipment Failure

Other (specify) _____

Type of Equipment at Point of Spill/Release: Production Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Previous repair work on 3-inch fiberglass flowline (Spill/Release Point ID 470915) failed causing a release of an unknown amount of hydrocarbon fluid. Failure occurred at the coupler that had been used to repair the flowline.

Describe measures taken to prevent the problem(s) from reoccurring:

Flowline system was shut-in upon notification of the release. Damaged section of flowline was removed and replaced with a new 3-foot section of fiberglass piping. Repaired section of flowline was pressure tested to confirm repairs.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: Corrective Actions Completed (documentation attached)

Work proceeding under an approved Form 27

Form 27 Remediation Project No: _____

OPERATOR COMMENTS:

Location coordinates initially reported for the release location were inaccurate. Coordinates should show the same location as spill/release point ID 470915 (40.129619, -104.798581).

The field in which the release occurred has the potential to be irrigated, which might create impacts to Waters of the State. This was not reflected in the initial spill report.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
