To whom this may concern:

I, Grady Wilson Commercial Applicator / Owner of Outlaw Environmental, LLC License # 13921 went and performed a site check/application on the GRMR:

Durham 7-32 sites: for noxious weeds. Upon arrival the site was clean, and native plant and grass growth appeared well. Most of the weeds present were in bunches across the location. There was a large amount of houndstongue, on the location and a large amount of Canada thistle, some toadflax, and whitetop on location, as well as along the access road. Weed growth on this location was more prevalent due to wildlife. A herbicide application was made to any remaining weeds. Overall The site was in good condition.

Thank you,

Grady Wilson
